

Technical Details

Operating conditions	
Maximum speed	≤ 16 bar
Temperature range	-30°C + 80°C
Maximum pressure	≤ 4m/s

DESIGN

PAK8 is a piston sealing set profile that consists of a PTFE piston sealing ring and an O-ring. PK8 is com-bined as a sealing unit and is appropriate for double acting pistons in pneumatic cylinders.

PAK8 is has minimal break out and dynamic slide friction. A steady movement is guaranteed even at low velocities.

FEATURES

- Flexible for easy installation
- Long life
- Low wear
- No stick - slip
- High extrusion resistance
- High temperature resistance
- Comes in a wide range of sizes

MATERIAL

Seal design comes in a variety of materials and sizes. For more information, please refer to MSDS data-sheet.

APPLICATIONS

Light duty applications
